Click “Restore” to restore the backup data on the specified device.Q: Cannot load or save File 2.0 DLL I am getting the error: Cannot load or save file 'File.dll'. when executing a.NET program which references the file. After researching and updating the target framework, changing the method signature to public and returning a Byte array the error does not change. I'm trying to make a file compatible for 64-bit windows and 32-bit windows (Windows Server 2003 32 bit). Does anybody know how to fix this? For the compiler, I'm using Visual Studio 2015 which is 64-bit, but the target framework is 32-bit. Here is the code that references the file: class Program { // Required for this program to run static void Main(string[] args) { // Load the assembly. Assembly as d4474df7b8
