For more information, see the Autodesk AutoCAD 2017 page. In addition to AutoCAD, you can also use the software to create, manipulate and view AutoCAD DWG and DXF files. Using AutoCAD or AutoCAD DWG/DXF for commercial purposes, such as designing or producing products, is not covered by the software license. If you are using AutoCAD or AutoCAD DWG/DXF in a non-commercial capacity, check the Autodesk web site to see if licensing is available. When you are using AutoCAD or AutoCAD DWG/DXF for commercial purposes, make sure to check the licensing terms for your AutoCAD product. AutoCAD or AutoCAD DWG/DXF is the most commonly used commercial-grade software for design and drafting, but for some types of commercial usage, AutoCAD LT is an alternative. Since the last major AutoCAD release in 2009, AutoCAD has been undergoing constant improvement. The

Is this a bug? A: After some researches and discussions with the "Microsoft xaml team" (thanks for your help guys, by the way) I have found the problem. In my system I have a Windows Form, in this form there is an Panel. In this panel there is a class MyPanel that inherits from Panel and it has the overridden OnRender method. That's why in my xaml I used MyPanel instead of Panel. So the solution was to use MyPanel instead of Panel in the xaml. Seal of the District of Columbia The seal of the District of Columbia is the official seal used to represent the District of Columbia in the United States. It was designed in 1899 by Washington, D.C. artist James Earle Fraser and is based on the official seal of the United States. Design The seal features the Potomac River with the Washington Monument in the center and the United States Capitol in the background. At the center is a shield featuring the District of Columbia motto "In God We Trust." A light blue panel with the words "United States of America" below, and a panel with a framed map of the District of Columbia in the lower right corner of the shield. History The seal was adopted on June 7, 1899 and was based on the official seal of the United States. The design was prepared by James Earle Fraser, a Washington, D.C. based artist who was commissioned in November 1898 to design the seal. On January 20, 1899, the seal was delivered to the United States Congress, which adopted the seal on February 12, 1899. The seal was printed on the law books as soon as it was enacted. Because of the distance between the District and the other federal territories, a different motto, "Unite we stand" was chosen. The motto "In God We Trust" was included to recognize the support for the Roman Catholic Church in the United States by the ruling class, as opposed to the original motto "E Pluribus Unum" which was meant to signify a nation that was united by a common law and language. The light blue color of the District's shield was also chosen to complement the red and blue of the United States.
